

Curved Dual Display

Driver Information Solution

Features:

- Cold forming glass lens enables a range of complex multi-curvature design studio requirements
 - Cluster: R750 concave
 - Center area: R250 convex
 - CID: R1200 concave
- Visteon bond-then-bend structural manufacturing process
- Leveraging the Visteon robotized bonding system

Benefits:

- Design differentiation enabled by multi-curvature displays behind a seamless glass lens
- Cold-forming glass lens offers the lowest-cost solution for curved displays
- Automotive-designed monolithic structure integrating open-cell FoG LCD and carrier-integrated backlight
- Structural and styling elements in single integrated housing
